Please change: "BDIC carrier system Water in the Big Ditch carrier system"
to just "Water in the Big Ditch carrier system."

It gets confusing otherwise.

For administrative purposes a31743 should mirror 59-5830 which should refer to a area 57 number
referencing just the contract and not segregated from 57-10349

If you assigned the Big Ditch contract a number like 57-10500, a contract resulting from 57-10349, would
the computer system handle that?

In the system it would show the base number 57-10500 with 59-5830 (a31743) as segregated.

Thank you for your attention to this matter,
